

Heritage Ranking Form - State Rank

Scientific Name: *Erpetogomphus compositus*
Common Name: White-belted ringtail
Classification: Invertebrate Animal

Heritage Rank: **S4**

Rank Date: 7/1/2016

Comments: Appears to be declining in WA, sensitive to agricultural practices. But still occurs in many places in OR.

Range Extent: F = 20,000-200,000 sq km (~8,000-80,000 sq mi)

Comments: None

Population Size: U = Unknown

Comments: None

Number of Occurrences: C = 21 - 80

Comments: 13 known locations, but they are large river stretches

Area of Occupancy: FG = 126-2,500 4-km² grid cells

Comments: None

Good Viability: D = Some (13-40) occurrences with excellent or good viability or ecological integrity

Comments: John Day River, Owyhee River

Environmental Sensitivity: Not Evaluated

Comments: None

Short Term Trends: G = Relatively Stable (<=10% change)

Comments: Jim Johnson states this species is secure in OR.

Long Term Trends: U = Unknown

Comments: None

Threat Impact: C = Medium

Comments:
Agriculture, pesticides, erosion, poor water quality.

Intrinsic Vulnerability: Not Evaluated

Comments: None

Rank Notes: None
