

Heritage Ranking Form - State Rank

Scientific Name: *Hoplistoscelis heidemanni*
Common Name: Heidemann's damsel bug
Classification: Invertebrate Animal

Heritage Rank: **S2S3**

Rank Date: 7/4/2016

Comments: Few known records but very little information available. Likely other populations exist but surveys have not been conducted. Global range is broad, and species uses a variety of habitats.

Range Extent: C = 250-1,000 sq km (~100-400 sq mi)

Comments: 930sq km range extent of known records, but there has been limited sampling efforts.

Population Size: Not assessed

Comments: None

Number of Occurrences: B = 6 - 20

Comments: Only two known EOs but this is likely an underestimate. Surveys needed.

Area of Occupancy: BD = 2-25 4-km² grid cells

Comments: Only two known collections, but this species has not been systematically searched for. Likely occurs elsewhere in OR>

Good Viability: U = Unknown

Comments: No information on viability of populations.

Environmental Sensitivity: Not Evaluated

Comments: None

Short Term Trends: U = Unknown

Comments: No trend information available.

Long Term Trends: 0

Comments: None

Threat Impact: D = Low

Comments:
No specific threats have been identified. Uses a variety of habitats in adjacent states.

Intrinsic Vulnerability: Not Evaluated

Comments: None

Rank Notes: None
