

Conservation Status Assessment

Scientific Name: *Ramaria gracilis*

Classification: Fungus

Assessment area: California

Heritage Rank: **S1?**

Rank Date: 4/22/2017

Assigned Rank Comments: None.

Rank Adjustment Notes: single collection >50 years ago,

Range Extent: F = 20,000-200,000 sq km (~8,000-80,000 sq mi)

Comments: The California range is 38,064 sq. km. There are sites in the Coastal Mountains of Humboldt (collected in 1977) and Mendocino (collected 1962) Counties and the Western Sierra Nevada Range in Nevada (collected 1972) and El Dorado (collected 1941) Counties. There are also 2 sites in the Bay area that were collected in 1934 and 1894.

Population Size: Not assessed

Comments: None

Number of Occurrences: B = 6 - 20

Comments: There are 6 known sites in California.

Area of Occupancy: D = 6-25 4-km² grid cells

Comments: This species occupies 6 grid squares in California.

Good Viability: A = No occurrences with excellent or good (A or B) viability or ecological integrity

Comments: No occurrences are in permanently protected areas.

Environmental Sensitivity: B = Narrow. Specialist or community with key requirements common

Comments: Saprophyte on conifer duff.

Short Term Trends: Not Evaluated

Comments: None

Long Term Trends: Not Evaluated

Comments: None

Threat Impact: C = Medium

Comments:

The two sites in the bay area may be threatened by residential development. The other sties may be threatened by timber harvest.

Intrinsic Vulnerability: Not Evaluated

Comments: None

Calculated Rank: S2

Rank Author: Michael Russell

Rank Reviewer: Ron Hamill

Definitions and Resources:

Rank Prefixes	
G	Global rank, applied to taxon's full geographic range
S	State rank, applied to taxon's range within the designated state
Rank Values	
1	Critically imperiled
2	Imperiled
3	Vulnerable
4	Apparently secure, uncommon but not rare
5	Secure, common, abundant, and widespread
