

Conservation Status Assessment

Scientific Name: *Ramaria suecica*

Classification: Fungus

Assessment area: Washington

Heritage Rank: **S1S2**

Rank Date: 6/7/2018

Assigned Rank Comments: None.

Rank Adjustment Notes: The only record from Washington is an old (1941) collection that only has the state of Washington listed as the location. Due to the uncertainty associated with that collection I M. Russell gave this species an SU ranking. R. Hamill says it is likely present and ranks it as S2. Compromise is S1S2 ranged rank.

Range Extent: A = <100 sq km (< ~40 sq mi)

Comments: There is a single collection made by J. M. Grant in 1941 that simply lists Washington as the location.

Population Size: Not assessed

Comments: None

Number of Occurrences: A = 1 - 5

Comments: Provided the collection is actually from Washington and is correctly identified, there is one known occurrence in Washington.

Area of Occupancy: A = 1 4-km² grid cell

Comments: There is a single grid square occupied by this species in Washington.

Good Viability: U = Unknown

Comments: The location of the species is not precise enough to know how viable the occurrence is.

Environmental Sensitivity: B = Narrow. Specialist or community with key requirements common

Comments: A saprotroph on litter.

Short Term Trends: Not Evaluated

Comments: None

Long Term Trends: Not Evaluated

Comments: None

Threat Impact: U = Unknown

Comments:

Intrinsic Vulnerability: Not Evaluated

Comments: None

Calculated Rank: S1

Rank Author: Michael Russell

Rank Reviewer: Ron Hamill; Lindsey Wise

References:

No additional references listed.

Definitions and Resources:

Rank Prefixes

G Global rank, applied to taxon's full geographic range

S State rank, applied to taxon's range within the designated state

Rank Values

1 Critically imperiled

2 Imperiled

3 Vulnerable

4 Apparently secure, uncommon but not rare

5 Secure, common, abundant, and widespread
