# Heritage Ranking Form - Global Rank

Scientific Name:	Arcangeliella crassa
Common Name:	Fungus
Classification:	Fungus
Range Extent:	F = 20,000-200,000 sq km (~8,000-80,000 sq mi)

Comments: About 40000 square miles, from southern Wasco County, Oregon, southward in the Cascades and the Siskiyou Mts. of Coos County then south to Stanislaus National Forest, California

Area of Occupancy: D = 6-25 4-km2 grid cells

Comments: 9 sites; 9 grid cells; 3 in Oregon and 6 in California. Camacho (2002) believes to be undercollected based on personal experience in California.

## Number of

Occurrences:	B = 6 - 20
--------------	------------

Comments: None

#### Population Size: U = Unknown

Comments: None

#### **Good Viability:**

Comments: None

#### Environmental

**Specificity:** B = Narrow. Specialist or community with key requirements common

Comments: Mycorrhizal species, associated with various Pinaceae spp., Abies concolor, A. magnifica, Pinus contorta, P. jeffreyi, or P. ponderosa

#### Short Term Trends: U = Unknown

Comments: None

Long Term Trends:	U = Unknown
Comments: None	
Threat Impact:	C = Medium
Comments: None	
Intrinsic Vulnerability:	Not Evaluated
Comments: None	

G3

### Heritage Rank:

Comments: Range extent large, from northern Oregon to south-central California; one expert believes species is undercollected; threatened by timber harvest

Rank Notes: None
