Washington Status Factors

Elcode    NFSM000011
Gname     ASTEROPHORA LYCOPERDOIDES

Number of Occurrences
U = Unknown
Comments

Number of Occurrences with Good Viability
U = Unknown what number of occurrences with good viability
Comments

Population Size
U = Unknown
Comments

Range Extent
U = Unknown
Comments

Area of Occupancy
U = Unknown
LU = Unknown
Comments

Long-term Trend in Population Size, Extent of Occurrence, Area of Occupancy, and/or
Number or Condition of Occurrences
U = Unknown. Long-term trend in population, range, area occupied, or number or condition of occurrences unknown
Comments

Short-term Trend in Population Size, Extent of Occurrence, Area of Occupancy, and/or
Number or Condition of Occurrences
U = Unknown. Short-term trend in population, range, area occupied, and number and condition of occurrences unknown.
Comments
**Threats**
G  = Slightly threatened. Threats, while recognizable, are of low severity, or affecting only a small portion of the population, occurrences, or area. Ecological community occurrences may be altered in minor parts of range or degree of alteration falls within the natural variation of the type.

Comments  This species is dependent on a group of mushrooms that are dependent on their mycorrhizal host tree.

**Number of Appropriately Protected and Managed Occurrences**
U  = Unknown whether any occurrences are appropriately protected and managed

Comments

**Intrinsic Vulnerability**
U  = Unknown

Comments

**Environmental Specificity**
A  = Very Narrow. Specialist or community with key requirements scarce.

Comments  This species is dependent on a group of Russula spp.

**Other Considerations**

**Edition**  11/11/2002  **Edauthor**  Francisco J. Camacho

**Grank**  S3  **Grank Date**  11/11/2002

**Greasons**
This is a small fungus that is easily overlooked. It will only be found on rotting species of Russula which are often ignored. It should be found throughout Washington wherever it's host mushroom occurs.
