Oregon Status Factors

Elcode  NFSM000016
Gname  BOLETUS PULCHERRIMUS

Number of Occurrences
B  = 6 - 20
Comments  Known from 6 sites in Oregon.

Number of Occurrences with Good Viability
B  = Very few (1-3) occurrences with good viability
Comments  Because this species has been found at the same site several times.

Population Size
A  = 1-50 individuals
Comments

Range Extent
B  = 100-250 km2 (about 40-100 square miles)
Comments  Found in the lower half of the Willamette Valley foothills, east side. I spent a lot of time on the foothills of the coast range and have never seen this species. It is also found in the Ashland area.

Area of Occupancy
A  = <0.4 km2 (less than about 100 acres)
LA  = <4 km (less than about 2.5 miles)
Comments

Long-term Trend in Population Size, Extent of Occurrence, Area of Occupancy, and/or Number or Condition of Occurrences
U  = Unknown. Long-term trend in population, range, area occupied, or number or condition of occurrences unknown
Comments

Short-term Trend in Population Size, Extent of Occurrence, Area of Occupancy, and/or Number or Condition of Occurrences
U  = Unknown. Short-term trend in population, range, area occupied, and number and condition of occurrences unknown.
Comments
Threats
B  = Moderate and imminent threat. Threat is moderate to severe and imminent for a significant proportion (20-60%) of the population, occurrences, or area. Ecological community occurrences are directly impacted over a moderate area, either causing irreversible damage or requiring a long-term recovery.

Scope  Moderate  Severity  Moderate  Immediacy  Moderate

Comments  This is a mycorrizhal species; it is dependent on a host tree for its carbohydrates. Studies have shown that if the tree is killed the mycorrizhal fungi die shortly after. The one possibly saving feature of this species is the spore bank. However, nothing is known about the spore bank of this species.

Number of Appropriately Protected and Managed Occurrences
A  = None. No occurrences appropriately protected and managed

Comments

Intrinsic Vulnerability
U  = Unknown

Comments

Environmental Specificity
B  = Narrow. Specialist or community with key requirements common.

Comments

Other Considerations
ORNHIC - List 1

Grank  S2  Grank Date  11/11/2002

Greasons
Known from 6 sites in Oregon. This is a large mushroom. Not easily overlooked by mushroomers. However, it is not easy to identify. There are several look-a-likes.
