Washington Status Factors

Elcode  NFSM000026
Gname  CLAVARIADELPHUS LIGULA
Gcomname

Number of Occurrences
D  = 81 - 300
Comments  There are 34 records in from western WA

Number of Occurrences with Good Viability
C  = Few (4-12) occurrences with good viability
Comments  There are 7 occurrences in protected sites.

Population Size
B  = 50-250 individuals
Comments

Range Extent
F  = 20,000-200,000 km2 (about 8,000-80,000 square miles)
Comments  Range is in western WA

Area of Occupancy
B  = 0.4-4 km2 (about 100-1,000 acres)
LB  = 4-40 km (about 2.5-25 miles)
Comments

Long-term Trend in Population Size, Extent of Occurrence, Area of Occupancy, and/or Number or Condition of Occurrences
U  = Unknown. Long-term trend in population, range, area occupied, or number or condition of occurrences unknown
Comments

Short-term Trend in Population Size, Extent of Occurrence, Area of Occupancy, and/or Number or Condition of Occurrences
U  = Unknown. Short-term trend in population, range, area occupied, and number and condition of occurrences unknown.
Comments
Threats
C = Substantial, non-imminent threat. Threat is moderate to severe but not imminent (> 10 years) for most of the population, occurrences, or area.

Scope  High    Severity  High    Immediacy  Unknown

Comments

Number of Appropriately Protected and Managed Occurrences
C = Several (4-12) occurrences appropriately protected and managed

Comments There are 7 occurrences in protected sites.

Intrinsic Vulnerability
A = Highly Vulnerable. Species is slow to mature, reproduces infrequently, and/or has low fecundity such that populations are very slow (> 20 years or 5 generations) to recover from decreases in abundance; or species has low dispersal capability such that extirpated populations are unlikely to become reestablished through natural recolonization (unaided by humans). Ecological community occurrences are highly susceptible to changes in composition and structure that rarely if ever are reversed through natural processes even over substantial time periods (> 100 years).

Comments This is a mycorrhizal species susceptible to logging activities.

Environmental Specificity
B = Narrow. Specialist or community with key requirements common.

Comments Mycorrhizal species

Other Considerations

Edition  11/12/2002    Edauthor Efren Cazares

Grank  S4    Grank Date  11/12/2002

Greasons
Fairly common mycorrhizal species worldwide. There are 7 out of 34 occurrences in protected sites. Apparently secure in WA.
