

Heritage Ranking Form - Global Rank

Scientific Name: Erigeron stansellii

Common Name: None

Classification: Vascular Plant

Range Extent: A = <100 sq km (< ~40 sq mi)

Known locations cover about 11 square km. Estimated range based on habitat: serpentine sites in Coast Range in southwestern Curry County (Chambers 2011).

Population Size: U = Unknown

Comments: Detailed studies have not been done, population unknown (Chambers 2011).

Number of Occurrences: A = 1 - 5

Comments: Four collections noted in Chambers (2011) are found at two localities.

Area of Occupancy: B = 2 4-km² grid cells

Comments: Two known localities. Could be more locations within potential range.

Good Viability:

Comments: None

Environmental Specificity: A = Very narrow. Specialist or community with key requirements scarce

Comments: Only known from serpentine sites.

Short Term Trends: U = Unknown

Comments: None

Long Term Trends: U = Unknown

Comments: None

Threat Impact: U = Unknown

Comments: None

**Intrinsic
Vulnerability:** Not Evaluated

Comments: None

Heritage Rank: G1

Comments: Currently only known from two localities in Coast Range of southwestern Curry County. Associated with serpentine habitat. This is a recently described species (Chambers 2011). More locations may be discovered with survey efforts.

Rank Notes: None
