

Heritage Ranking Form - Global Rank

Scientific Name: Fluminicola sp. 14

Common Name: Tall pebblesnail

Classification: Invertebrate Animal

Range Extent: A = <100 sq km (< ~40 sq mi)

Comments: .0078 sq km - only known from 1 site

Area of Occupancy: A = 1 4-km² grid cell

Comments: 1 4-km sq grid cell

Number of Occurrences: A = 1 - 5

Comments: 1 EO

Population Size: AE = 1 - 10,000 individuals

Comments: Guess - based on single site

Good Viability: AB = None to very few (0-3) occurrences with good viability

Comments: Only 1 EO, assumed to be extant. No information on health of population. Reported as common at this site in 1992 (Frest & Johannes 1998).

Environmental Specificity: A = Very narrow. Specialist or community with key requirements scarce

Comments: Found in 1 large, cold spring

Short Term Trends: U = Unknown

Comments: None

Long Term Trends: U = Unknown

Comments: None

Threat Impact: C = Medium

Comments: Dredging, nutrient enrichment, irrigation, grazing, sedimentation, lake level fluctuation.

**Intrinsic
Vulnerability:** Not Evaluated

Comments: None

Heritage Rank: G1

Comments: Limited to one site; status at that site unknown.

Rank Notes: None
