**Conservation Status Assessment**

**Scientific Name:** Gautieria otthii  
**Classification:** Fungus  
**Assessment area:** Global

**Heritage Rank:** G3Q  
**Rank Date:** 2/28/2018

Assigned Rank Comments: None.  
Rank Adjustment Notes: Ranked as a G3 according to this known data, however, according to Camacho there may still be some uncertainty as to whether the west coast species are the same as the European species. Could be more common than this suggests, or two separate species.

**Range Extent:** H = >2,500,000 sq km (> 1,000,000 sq mi)

Comments: "Found in Europe, Alaska, Eastern and Western North America. The broad range suggests that this is a successful fungus, although the taxonomy is clearly somewhat confused, especially as to how this is applied in the Pacific Northwest." - Camacho 2002. Assessment completed using the occurrence information for specimens identified as Gautieria otthii, however, there still may be some uncertainty surrounding this species.

**Population Size:** Not assessed  
Comments: None

**Number of Occurrences:** C = 21 - 80  
Comments: At least 30 known occurrences for this species, probably more in Europe.

**Area of Occupancy:** E = 26-125 4-km2 grid cells  
Comments: At least 30 occupied grid cells.

**Good Viability:** B = Very few (1-3) occurrences with excellent or good viability or ecological integrity  
Comments: At least 2 occurrences are in protected areas: Yolla Bolly-Middle Eel Wilderness, Yellowstone National Park. There may very well also be protected occurrences among the European occurrences.

**Environmental Sensitivity:** Not Evaluated  
Comments: None

**Short Term Trends:** Not Evaluated  
Comments: None

**Long Term Trends:** Not Evaluated  
Comments: None
**Threat Impact:**
C = Medium

**Intrinsic Vulnerability:**
Not Evaluated

**Calculated Rank:**
G3

**Rank Author:**
Caitlin Lawrence

**Rank Reviewer:**
Matt Trappe; Lindsey Wise
