Washington Status Factors

Elcode  NFSM000104
Gname  MYCENA HUDSONIANA
Gcomname

Number of Occurrences
B  = 6 - 20
Comments

Number of Occurrences with Good Viability
U  = Unknown what number of occurrences with good viability
Comments

Population Size
A  = 1-50 individuals
Comments

Range Extent
D  = 1,000-5,000 km2 (about 400-2,000 square miles)
Comments  Known from the Olympics and the Cascades.

Area of Occupancy
B  = 0.4-4 km2 (about 100-1,000 acres)
LB  = 4-40 km (about 2.5-25 miles)
Comments

Long-term Trend in Population Size, Extent of Occurrence, Area of Occupancy, and/or Number or Condition of Occurrences
D  = Moderate Decline (decline of 25-50%)
E  = Relatively Stable (±25% change)
Comments

Short-term Trend in Population Size, Extent of Occurrence, Area of Occupancy, and/or Number or Condition of Occurrences
D  = Declining. Decline of 10-30% in population, range, area occupied, and/or number or condition of occurrences
E  = Stable. Population, range, area occupied, and/or number or condition of occurrences unchanged or remaining within ±10% fluctuation
Comments
Threats
D = Moderate, non-imminent threat. Threat is moderate to severe but not imminent for a significant portion of the population, occurrences, or area.

Scope Moderate Severity Moderate Immediacy Low

Comments

Number of Appropriately Protected and Managed Occurrences
C = Several (4-12) occurrences appropriately protected and managed

Comments

Intrinsic Vulnerability
B = Moderately Vulnerable. Species exhibits moderate age of maturity, frequency of reproduction, and/or fecundity such that populations generally tend to recover from decreases in abundance over a period of several years (on the order of 5-20 years or 2-5 generations); or species has moderate dispersal capability such that extirpated populations generally become reestablished through natural recolonization (unaided by humans). Ecological community occurrences may be susceptible to changes in composition and structure but tend to recover through natural processes given reasonable time (10-100 years).

Comments

Environmental Specificity
B = Narrow. Specialist or community with key requirements common.

Comments

Other Considerations

Edition 11/24/2002 Edauthor Michelle Seidl

Grank S3 Grank Date

Greasons
Known from the Olympics and the Cascades. Half of the known sites are in protected areas. This taxon has a narrow range extent.
