

Heritage Ranking Form - State Rank

Scientific Name: Ochotona princeps

Common Name: American pika

Classification: Vertebrate Animal

Range Extent: F = 20,000-200,000 sq km (~8,000-80,000 sq mi)

Comments: None

Area of Occupancy: EF = 26-500 4-km² grid cells

Comments: Occurs only at higher elevations and in Columbia River Gorge in OR

Number of Occurrences: U = Unknown

Comments: None

Population Size: 0

Comments: None

Good Viability: DE = Some to many (13-125) occurrences with good viability

Comments: Many sites are relatively secure, but number of sites unclear.

Environmental Specificity: None

Comments: None

Short Term Trends: G = Relatively Stable (<=10% change)

Comments: None

Long Term Trends: U = Unknown

Comments: None

Threat Impact: B = High

Comments: Climate change is a threat, esp at lower elevation sites.

**Intrinsic
Vulnerability:** Not Evaluated

Comments: None

Heritage Rank: S3?

Comments: Still widespread at higher elevations in OR, but threatened by climate change

Rank Notes: None
