Heritage Rank Status Factors

Elcode  NFSM000131
Gname   PHELLODON ATRATUS
Gcomname

Number of Occurrences
C  = 21-80
Comments

Number of Occurrences with Good Viability
D  = Some (13-40) occurrences with good viability
Comments

Population Size
C  = 250-1,000 individuals
Comments

Range Extent
E  = 5,000-20,000 km² (about 2,000-8,000 square miles)
Comments  Endemic to the Pacific Northwest, from British Columbia to California.

Area of Occupancy
B  = 0.4-4 km² (about 100-1,000 acres)
C  = 4-20 km² (about 1,000-5,000 acres)
LB = 4-40 km (about 2.5-25 miles)
LC = 40-200 km (about 25-125 miles)
Comments

Long-term Trend in Population Size, Extent of Occurrence, Area of Occupancy, and/or Number or Condition of Occurrences
U  = Unknown. Long-term trend in population, range, area occupied, or number or condition of occurrences unknown
Comments

Short-term Trend in Population Size, Extent of Occurrence, Area of Occupancy, and/or Number or Condition of Occurrences
U  = Unknown. Short-term trend in population, range, area occupied, and number and condition of occurrences unknown.
Comments
**Threats**
B = Moderate and imminent threat. Threat is moderate to severe and imminent for a significant proportion (20-60%) of the population, occurrences, or area. Ecological community occurrences are directly impacted over a moderate area, either causing irreversible damage or requiring a long-term recovery.

**Number of Appropriately Protected and Managed Occurrences**
D = Many (13-40) occurrences appropriately protected and managed

**Intrinsic Vulnerability**
U = Unknown

**Environmental Specificity**
B = Narrow. Specialist or community with key requirements common.

**Other Considerations**
National Rank - N4

**Edition** 11/17/2002  **Edauthor** Francisco J. Camacho

**Grank** G4  **Grank Date** 11/17/2002

**Greasons**
Endemic to the Pacific Northwest, from British Columbia to California. All of the collections in the ISMS database are from the last few years. I suspect that this is a common fungus. My experience for several years along the central Oregon coast is that it is common.
