

Conservation Status Assessment

Scientific Name: *Ramaria verlotensis*

Classification: Fungus

Assessment area: Washington

Heritage Rank: **S1**

Rank Date: 4/22/2017

Assigned Rank Comments: None.

Range Extent: A = <100 sq km (< ~40 sq mi)

Comments: There is a single collection of this species from Snohomish County, Washington.

Population Size: Not assessed

Comments: None

Number of Occurrences: A = 1 - 5

Comments: There is one occurrence of this species in Washington.

Area of Occupancy: A = 1 4-km² grid cell

Comments: There is one grid square occupied by this species in Washington.

Good Viability: A = No occurrences with excellent or good (A or B) viability or ecological integrity

Comments: The occurrences is not in a permanently protected area.

Environmental Sensitivity: B = Narrow. Specialist or community with key requirements common

Comments: A mycorrhizal species.

Short Term Trends: Not Evaluated

Comments: None

Long Term Trends: Not Evaluated

Comments: None

Threat Impact: C = Medium

Comments:

The site may be threatened by timber harvest.

Intrinsic Vulnerability: Not Evaluated

Comments: None

Calculated Rank: S1

Rank Author: Michael Russell

Rank Reviewer: Ron Hamill

References:

No additional references listed.

Definitions and Resources:

Rank Prefixes

G Global rank, applied to taxon's full geographic range

S State rank, applied to taxon's range within the designated state

Rank Values

1 Critically imperiled

2 Imperiled

3 Vulnerable

4 Apparently secure, uncommon but not rare

5 Secure, common, abundant, and widespread
